

Advanced Cooling Systems

- Redundant Compressors (Plug & Play)
- Dual Closed Loop Design (Glycol)
- Allows for Maintenance Without Interfering with Cooling

- Air Temperature Constant from Top to Bottom of Cold Aisles
- Encapsulation of Cold Air
- Cold Air Moves Through Servers and Appliances

- Extended Duct Work Pulls Hot Air Out of Room
- CRAC Fan Speed Controlled by VFD's to Maintain Static Pressure
- 30" Raised Floor Allows Large Volume of Air Movement
